B.Tech (Computer Science And Engineering)

Key Skills

Full Stack : MERN Stack , NextJs	Frontend : React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, GSAP, shadcn/ui	Backend : NodeJs, ExpressJs, Django, EJS, Resend, Zod, NextAuth	Cloud, Library & Tools : Git, GitHub, Vercel, Render, Netlify, Cloudinary, Hugging Face , Azure
---	--	---	---

Work Experience

Web Developer Intern at B365 Advisors Project Link 1st March, 2025 - 31 st May, 2025	• Built a responsive web app with advanced scroll-triggered animations using Next.js and GSAP. • Deployed on Vercel, achieving fast load times and strong performance scores. • Collaborated in a 5-member Agile team, contributing to core frontend features. • Designed pixel-perfect, responsive layouts with Tailwind CSS, ensuring cross-browser compatibility. • Worked with leadership on feature planning, bug fixes, and performance optimization.
Software Developer – PMKVY 390 Hours	• Developed interactive web applications with modern frameworks. • Ensured code quality + compliance following prescribed programming and internal language policies.
Technical Head – • Trinity Cyber Forum (TCF) • Computer Society of India (CSI) • Arcadia Society Current Project Link	• Lead and coordinate technical operations across three student societies. • Oversee web development projects, coding events, and workshops. • Guide teams in designing and maintaining websites and digital systems for society initiatives.
SIG, Web Dev Head – CSI (IPEC) Mar 2025 – Sep 2025	• Simplified web concepts for beginners through hands-on coding sessions. • Taught modern JS frameworks, animation libraries, and responsive design. • Led live project builds covering planning, coding, and deployment. • Mentored peers in Git, GitHub, and industry-standard workflows.

Projects

RespiraDx Project Link	Built a full-stack AI-powered lung CT screening platform using Next.js, TypeScript, MongoDB, Mongoose, NextAuth, and Cloudinary . Implemented patient & doctor dashboards, AI screening reports, health/screening analytics, appointment scheduling, role-based access control, OAuth authentication , and responsive modern UI.
OptiRoll Project Link	Developed a full-stack face-recognition attendance system with separate logins for Admin, Teacher, and Student . Integrated live facial embedding generation via Python and automated attendance tracking with 2FA and email alerts . Admins can manage users and dashboards, teachers can mark attendance, and students can view real-time records. Mern Stack, Python(Facenet), Kubernetes, Vercel, Render, Cloudinary, Resend
SpendLens Project Link	Full-stack subscription management web application featuring Google & GitHub OAuth, OTP email verification , secure authentication, subscription tracking, analytics dashboard, and automated renewal email reminders . Next.js, MongoDB, Cloudinary, NextAuth, Zod , Tailwind CSS, ShadCN, Resend, Vercel
HireSphere Project Link	Built a full-stack recruitment platform with job posting, candidate application, shortlisting, hiring, and talent-pool features; boosted processing speed and recruiter–applicant engagement. Mern Stack, GSAP, Cloudinary, Vercel, Render
UsStory Project Link	Developed a feature-rich storytelling platform allowing users to create customizable story pages with image uploads, music selection, relationship tagging, public/private visibility. Integrated Cloudinary for media handling, implemented secure session-based authentication, built animated UI using React + GSAP. Backend with Express & MongoDB and deployed for production .

Awards and Certification

• Full Stack Web Development with AI Tools by Edunet Foundation • MongoDB Course Certification. • Generative AI Literacy by IT-ITeS SSC Nasscom • IoT for Cyber Physical Systems – IHUB Divya Sampark, IIT Roorkee • Introduction to Cybersecurity – Cisco Networking Academy.	• Database Programming with SQL by Oracle Academy. • AI Skills Passport offered by EY and Microsoft • AWS Academy Graduate - Cloud Foundation • Software Programmer - PMKVY. • Sig WebDev - CSI Society of India.
