## Projects

|                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Business 365 Advisors Website</b><br><a href="#">Project Link</a>        | Designed and deployed an <b>animated, responsive business site using GSAP</b> for smooth interactive transitions, enhancing brand presence and user engagement.                                                                                                                                                                                                                                                                                                  |
| <b>HireSphere</b><br><a href="#">Project Link</a>                           | Built a <b>full-stack recruitment platform</b> with job posting, candidate application, shortlisting, hiring, and talent-pool features; boosted processing speed and recruiter–applicant engagement.<br><b>Mern Stack, GSAP, Cloudinary, Vercel, Render</b>                                                                                                                                                                                                      |
| <b>UsStory</b><br><a href="#">Project Link</a>                              | Developed a feature-rich storytelling platform allowing users to create customizable story pages with image uploads, music selection, relationship tagging, public/private visibility. Integrated <b>Cloudinary</b> for media handling, implemented secure session-based authentication, built animated <b>UI using React + GSAP. Backend with Express &amp; MongoDB and deployed for production.</b>                                                            |
| <b>OptiRoll</b><br><a href="#">Project Link</a>                             | Developed a <b>full-stack face-recognition attendance system</b> with <b>separate logins for Admin, Teacher, and Student</b> . Integrated live facial embedding generation via Python and <b>automated attendance tracking with 2FA and email alerts</b> . Admins can manage users and dashboards, teachers can mark attendance, and students can view real-time records.<br><b>Mern Stack, Python( Facenet), Kubernetes, Vercel, Render, Cloudinary, Resend</b> |
| <b>Base Number Convertor and Calculator</b><br><a href="#">Project Link</a> | Engineered an algorithm-driven tool for generating, converting, and calculating across multiple number bases (binary, decimal, hexadecimal, etc.) with high accuracy and efficiency.                                                                                                                                                                                                                                                                             |

## Awards and Certification

- Full Stack Web Development with AI Tools by Edunet Foundation
  - MongoDB Course Certification.
  - Generative AI Literacy by IT-ITeS SSC Nasscom
  - IoT for Cyber Physical Systems – IHUB Divya Sampark, IIT Roorkee
  - Introduction to Cybersecurity – Cisco Networking Academy.
- Database Programming with SQL by Oracle Academy.
  - AI Skills Passport offered by EY and Microsoft
  - AWS Academy Graduate - Cloud Foundation
  - Software Programmer - PMKVY.
  - Sig WebDev - CSI Society of India.
- 3rd place, Silver Jubilee Poster Presentation (IPEC) – 2022 & 2023.
