Work Experience

Web Developer Intern at B365 Advisors 1st March, 2025 - 31 st May, 2025	- Built a responsive web app with advanced scroll-triggered animations using Next.js and GSAP. Deployed on Vercel, achieving fast load times and strong performance scores. - Collaborated in a 5-member Agile team, contributing to core frontend features. - Designed pixel-perfect, responsive layouts with Tailwind CSS, ensuring cross-browser compatibility. - Worked with leadership on feature planning, bug fixes, and performance optimization.
Software Developer – PMKVY 390 Hours	- Developed interactive web applications with modern frameworks. - Ensured code quality + compliance following prescribed programming and internal language policies.
Technical Head – - Trinity Cyber Forum (TCF) - Computer Society of India (CSI) - Arcadia Society Current	Lead and coordinate technical operations across three student societies. Oversee web development projects, coding events, and workshops. - Guide teams in designing and maintaining websites and digital systems for society initiatives.
SIG, Web Dev Head – CSI (IPEC) Mar 2025 – Sep 2025	- Simplified web concepts for beginners through hands-on coding sessions. Taught modern JS frameworks, animation libraries, and responsive design. - Led live project builds covering planning, coding, and deployment. - Mentored peers in Git, GitHub, and industry-standard workflows.

Projects

B365 Advisors Website Project Link	Designed and deployed an animated, responsive business site using GSAP for smooth interactive transitions, enhancing brand presence and user engagement. NextJs, GSAP
OptiRoll Project Link	Developed a full-stack face-recognition attendance system with separate logins for Admin, Teacher, and Student . Integrated live facial embedding generation via Python and automated attendance tracking with 2FA and email alerts . Admins can manage users and dashboards, teachers can mark attendance, and students can view real-time records. Mern Stack, Python(Facenet), Kubernetes, Vercel, Render, Cloudinary, Resend
SpendLens Project Link	Full-stack subscription management web application featuring Google & GitHub OAuth, OTP email verification , secure authentication, subscription tracking, analytics dashboard, and automated renewal email reminders . Next.js, MongoDB, Cloudinary, NextAuth, Zod , Tailwind CSS, ShadCN, Resend, Vercel
HireSphere Project Link	Built a full-stack recruitment platform with job posting, candidate application, shortlisting, hiring, and talent-pool features; boosted processing speed and recruiter–applicant engagement. Mern Stack, GSAP, Cloudinary, Vercel, Render
UsStory Project Link	Developed a feature-rich storytelling platform allowing users to create customizable story pages with image uploads, music selection, relationship tagging, public/private visibility. Integrated Cloudinary for media handling, implemented secure session-based authentication, built animated UI using React + GSAP. Backend with Express & MongoDB and deployed for production.

Awards and Certification

- Full Stack Web Development with AI Tools by Edunet Foundation - MongoDB Course Certification. - Generative AI Literacy by IT-ITeS SSC Nasscom - IoT for Cyber Physical Systems – IHUB Divya Sampark, IIT Roorkee - Introduction to Cybersecurity – Cisco Networking Academy.	- Database Programming with SQL by Oracle Academy. - AI Skills Passport offered by EY and Microsoft - AWS Academy Graduate - Cloud Foundation - Software Programmer - PMKVY. - Sig WebDev - CSI Society of India.
